

Week of August 17, 2026

Activity

Crews will continue several activities within the AWPf site, including:

- Backfilling and importing dirt as part of ongoing site earthwork
- Mobilizing and installing shoring (excavation support)
- Continuing construction of the soil nail retaining wall

Trucks and heavy equipment will continue entering and exiting the construction site throughout the week. Excavation, earthwork, and other construction activities may generate temporary daytime noise and dust. Crews will implement measures to help minimize these impacts throughout construction.

Agoura Road Utility Work

Utility work is also scheduled along Agoura Road adjacent to the AWPf site. Southern California Edison is scheduled to conduct utility work in front of the AWPf site. Asphalt placement and paving will also be performed.

Traffic Impacts

Temporary traffic control will be required while this work is completed. Motorists may encounter flaggers and a single lane closure along Agoura Road. Please use caution when traveling through the area, follow posted traffic-control signs, and allow additional travel time.

Construction is a dynamic process. This information and the project schedule are subject to change due to weather, field conditions, and other factors.
